

□ classes at the 32 pieces L_ζ

□ classes at M_1, M_2, M_3

$\Gamma_\tau, \tau = (2, 0, 0)$: 4 components

$\Gamma_\tau, \tau = (1, 1, 0)$: 16 components

kernel on the L_ζ :

$$3 \cdot 4 \cdot 1 + 3 \cdot 16 \cdot 4 = 204$$
